DR. LEARY'S ANSWER FOR VARICOSE VEINS AND UNWANTED FAT
Dr. Leary has been practicing in Newport Beach for over a decade, providing safe, effective, minimally invasive vein procedures. His overall approach addresses all aspects of the patient's condition and not just the vein in order to control their vein disease for life. Dr. Leary takes the same approach with non invasive procedures.

"Over the years many of my patients have asked for my opinion regarding non-surgical procedures for skin rejuvenation and body contouring. I have been waiting for a safe, effective treatment to meet my patients' needs. Medical companies approach me frequently with new innovative equipment but I have been skeptical and underwhelmed... until now. I am proud to offer UltraShape and VelaShape III in my practice."

Dr. Leary researched UltraShape extensively, reviewed the clinical studies and safety data, and has seen dramatic results in his patients. He is a true believer in this treatment. If you have stubborn areas of fat that will not change even after you exercise regularly and eat a healthy diet, you will love UltraShape. This is a non-surgical treatment that permanently destroys fat cells with no bruising, no downtime and no pain!

"I only provide safe and efficacious treatments. After researching many types of skin tightening and body contouring devices, I chose UltraShape for non-surgical body contouring."
